Update on Laboratory Results

The Board of Botswana Metals wish to update the market in respect to the 286 drill core samples submitted to SGS Independent Laboratories South Africa for assay results. As reported to the ASX on 13 October 2014 a preliminary report from SGS has been received. It was expected that a detailed report would be available by this week so that the joint venture partners (BCL and BML) could compile a report for release. Unfortunately the detailed assay analysis has not yet been received from SGS. BML has no control over this process. Every effort is being made to expedite the results. Once received the market will be informed.

About BCL Limited

BCL Limited ("BCL") is a world-class Botswana nickel mining and smelting operation owned by the Botswana Government.

The company commenced operations in 1959 and is now one of the largest private sector employers in Botswana.

BCL Limited produces two types of finished matte containing nickel, copper and cobalt, and platinum group and precious metals to a smaller extent. The Selebi Phikwe ore deposits are owned and operated by BCL Limited.

The Selebi copper and Nickel ore body was discovered in 1963, and higher grade ore was discovered at Phikwe in 1966. Mining of Nickel-copper ore commenced in 1973 and since 1980, BCL's smelter has operated at an annual production rate of approximately 50,000 tonnes of Nickel-copper matte.

BCL Investments (Pty) Limited is a wholly owned subsidiary of BCL Limited. BCL employs approximately 5,000 people in the township of Selebi Phikwe that has a population of 50,000.

About the BCL Limited Farm-In Joint Venture on PL 110/94, PL 111/94 and PL 54/98

BCL Investments (Pty) Limited ("BCL"), under the joint venture agreement, can spend an initial AUD\$4 million on a drilling program to earn 40% of the projects over these areas. BCL has the option to continue to fund the projects to the completion of a Bankable Feasibility Study ("BFS") to earn a 70% interest.

At that point BCL will have the off-take rights at commercial prices, to any ore mined. It is planned to truck ore to the BCL smelter operations at Selebi Phikwe for processing, which is situated 55 km to the southwest of our projects.

ABN 96 122 995 073

The Company will retain a 30% interest after the BFS is completed, at which time the management of the projects will be transferred to BCL.

The longevity of the BCL mine is dependent on additional ore outside of its existing Nickel resources being made available. BML is in a prime position to potentially provide additional ore to the BCL mine and smelter.

There are three Prospecting Licenses (PLs) under the joint venture agreement that cover 180SQKM of BML's 1,000 SQKM exploration portfolio. The joint venture area covers three known mineralisation zones and an area to the East with twenty three VTEM anomalies. The three mineralised areas are known as Maibele North (Nickel + Copper + PGE's), Airstrip Copper (Copper + Silver) and Dibete (Copper + Silver). To the east of these mineralised areas, the PL known as Takane has the twenty three VTEM anomalies recently identified and will be the subject of further exploration in this untested zone.

About Botswana Metals Limited

Botswana Metals Limited ("BML") is listed on the Australian Securities Exchange (ASX) and its stock code (ticker) is BML. BML is a mineral exploration company fully focused on its portfolio of exploration tenements covering approximately 1,000 sq. km all located in Botswana.

BML's objective is to discover an economic base and precious metals deposit in eastern Botswana on the well-known Limpopo Belt, which extends into Botswana from its neighbouring country Zimbabwe.

Recent exploration has resulted in three discoveries of Nickel-Copper and Copper-Silver mineralisation known as Airstrip Copper, Maibele North and Dibete. The Ni-Cu deposit at Maibele North is just east of Airstrip Copper whilst Dibete is 7 km to the south of Airstrip Copper. To the east of these discoveries, a recent VTEM program has identified at least 23 new VTEM anomalies that are planned to be part of the Company's exploration focus in the future.

55km to the south of the three discoveries is the BCL Limited mine and smelter. BML entered into a farm in agreement with BCL that became effective on 1 April 2014. BML has solid logistical support and the projects benefit from excellent infrastructure.

The Company is managed by experienced personnel with many years' experience in Botswana, as well as other African countries. Botswana is considered to be one of the most advanced African countries in respect to its mining and exploration laws, and for safety and education where English is spoken freely.

BML has offices in Australia (Melbourne) and Botswana (Selebi Phikwe).
