Chairman's Letter

Dear Shareholder,

I am pleased to offer Shareholders the opportunity to participate in this Rights Issue ("the Offer") to raise up to approximately \$750,000 (before issue costs).

Under the terms of this Offer, Eligible Shareholders will be offered 2 New Shares at an issue price of 1 cent per share, for every 5 Shares held at the Record Date along with 1 Attaching Option for nil consideration for each New Share subscribed for. Each Attaching Option has an exercise price of 3 cents and is exercisable at any time up until 5pm AEST on 30 June 2016. More details about the rights and liabilities attaching to these Securities are set out in Section 4 of this Prospectus.

The Company has entered into a Farm-in Joint Venture Agreement ("the Agreement") with BCL Investments Limited ("BCL"), a wholly-owned subsidiary of BCL Limited. BCL Limited is a mining and smelting company owned by the Botswana Government (94%) and Norilsk Nickel (6%). The condition precedent for the Agreement to come into effect is that the Department of Mines must approve the applications for Retention Licences which include the Maibele North- Ni +Cu project and the Airstrip & Dibete -Cu+Ag project. Should the Retention Licences be approved then under the terms of the Agreement and following an initial US\$4 million drilling program to earn 40% of the Retention Licences, BCL has the option to continue to fund the projects to the completion of a Bankable Feasibility Study ("BFS") and to earn up to a 70% interest. At that point BCL will have the off-take rights at commercial prices, to any ore mined. It is planned to truck ore to the BCL smelter operations for processing, 55km to the southwest at Selebi Phikwe. BML will retain a 30% interest after the BFS is completed, at which time the management of the projects will be transferred to BCL.

The purpose and application of the funds to be raised by the Offer are detailed in Section 4 of this Prospectus and I have summarised these as follows.

The funds are planned to be used to meet the costs of exploration and evaluation of the Maibele North- Ni +Cu project and the Airstrip & Dibete -Cu+Ag project within the Retention Licence areas, and to test additional new targets on Prospecting Licences outside of the Retention Licence areas over the next 12 months. The exploration will be designed to seek additional targets with the potential for mineralisation within our Botswana portfolio.

Shareholders need to be aware that there is a risk that the Retention Licence applications may not be approved by the Department of Mines in Botswana, meaning that the Company will be unable to fulfil the condition precedent of the abovementioned Farm-in Joint Venture Agreement, and you are guided to the risk factors in Section 5 of this Prospectus for further details.

Whilst your Board is encouraged with the results of recent exploration and the potential for future exploration, any investment in Botswana Metals Limited is speculative. Shareholders should consult with their professional advisors before making any investment decision pursuant to this Prospectus.

Yours sincerely,

Pat Volpe

Chairman

1 Details of the Offer

1.1 Offer

By this Prospectus, the Company is making a non-renounceable offer of Securities on the basis that for every five (5) Shares held by Eligible Shareholders at the Record Date, Eligible Shareholders will have the right (but not the obligation) to subscribe for two (2) New Shares at an issue price of \$0.01 (1 cent) per New Share, plus one (1) free Attaching Option per New Share for nil consideration ("**Rights Issue**").

The Rights Issue is non-renounceable and Eligible Shareholders may not sell or transfer all or any part of their Entitlement to this Rights Issue on ASX or otherwise.

In addition to the Rights Issue, Eligible Shareholders and other persons located and receiving this Prospectus in Australia are invited to apply for any Shortfall Shares pursuant to the Shortfall Offer. For further details in relation to the Shortfall Offer, please refer to Section 1.4 of this Prospectus.

As at the date of this Prospectus, the Company currently has 188,135,318 Shares on issue and 116,275,143 Options, exercisable at 10 cents per option at any time before 5pm on 30 June 2013, on issue. Holders of existing Options will not be entitled to participate in the Rights Issue; however they may exercise their existing Options prior to the Record Date if they wish to participate in the Rights Issue. Assuming none of these existing Options are exercised prior to the Record Date, the number of New Shares offered under this Prospectus will be 75,254,127 and the number of Attaching Options will be 75,254,127.

Eligible Shareholders may accept their Entitlement in whole or in part, or may decide not to accept their Entitlement at all. Shareholders who do not accept their Entitlement in full will, as a result of the Rights Issue, have their percentage shareholding in the Company diluted.

Eligible Shareholders wishing to take up all or part of their Entitlement under the Rights Issue can only do so by completing the Entitlement and Acceptance Form which accompanies this Prospectus.

1.2 Opening and Closing Dates of the Offer

The Opening Date of the Offer will be 26 June 2013 at 9.00am AEST and the Closing Date will be 11 July 2013 at 5.00pm AEST. The Directors reserve the right to close the Offer early or extend the Closing Date (as the case may be), should it be considered by them necessary to do so. Entitlement and Acceptance Forms received after the Closing Date will be rejected and Application Moneys will be returned without interest.

1.3 Entitlements and Acceptance

The Entitlement and Acceptance Form accompanying this Prospectus shows your Entitlement to New Shares for which you may apply and the total amount you would have to pay should you choose to take up all your Rights. Your Entitlement to New Shares is based on the number of Shares registered in your name on the Record Date. If you have fractions of entitlements then they will be rounded down to the next whole number in determining your share entitlements.

The Company will also issue you with one (1) Attaching Option for every one (1) New Share issued to you under the Offer for nil consideration.

You may subscribe for all or part of your Entitlement to New Shares prior to the Closing Date. You can also subscribe for any Shortfall Shares, as referred to in Section 1.4, should you take up your full Entitlement. You can only accept this Offer by completing the Entitlement and Acceptance Form. There is no minimum subscription level.

A completed and lodged Entitlement and Acceptance Form, together with a cheque for the Application Moneys or a BPAY® payment, constitutes a binding and irrevocable contract to buy the number of New Shares specified in the Entitlement and Acceptance Form or indicated by the amount of the BPAY® payment.

Completed Entitlement and Acceptance Forms together with the appropriate Application Moneys must reach the Company's share registry at the following address on or before the Closing Date:

Advanced Share Registry Services Limited

P.O. Box 1156

NEDLANDS WA 6909

or

Unit 2, 150 Stirling Highway

NEDLANDS WA 6009

Telephone (08) 9389 8033

Facsimile (08) 9389 7871

Payments by cheque must be made to "Botswana Metals Rights Issue Account" and crossed "not negotiable".

All payments must be made in Australian dollars.

If you decide not to accept your Entitlement, you need not do anything; however, your percentage shareholding in the Company will be diluted.

1.4 Shortfall Offer

Any Entitlement not taken up by Shareholders will become part of the Shortfall and be offered under the Shortfall Offer. Placement of the Shortfall under the Shortfall Offer will be managed on a best endeavours basis by Foxfire Capital Pty Ltd (a company of which Mr Volpe is a shareholder) ("Foxfire"), a holder of an Australian Financial Services Licence (AFSL).

The offer of New Shares under the Shortfall Offer is a separate offer pursuant to this Prospectus and is independent from the Rights Issue and will remain open after the Rights Issue has closed to the extent permitted by the ASX Listing Rules. The issue price of any Shares issued pursuant to the Shortfall Offer shall be \$0.01 (1 cent), being the price at which the Entitlement has been offered to Eligible Shareholders pursuant to this Prospectus.

In addition to being able to apply for New Shares pursuant to section 1.3, Eligible Shareholders who subscribe for their full Entitlement will also have the opportunity to apply for New Shares pursuant to the Shortfall Offer, subject to the limitations discussed below.

The Company will pay a commission to Foxfire for any Shortfall placed.

The Directors will, in consultation with Foxfire, allot additional New Shares to Eligible Shareholders who apply for New Shares in excess of their full Entitlement under the Shortfall Offer if there is a Shortfall. The Directors retain the right to place any other part of the Shortfall Offer to professional and sophisticated investors at their discretion.

Shortfall Shares will be issued at the same price and on the same terms as the New Shares and an Eligible Shareholder may only make an application for New Shares pursuant to the Shortfall Offer if they apply for their maximum Entitlement.

Shortfall Shares will only be issued if the Offer is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions. If the Company receives applications for Shortfall Shares that would result in the Offer being oversubscribed then the Company will not accept such oversubscriptions and will reject applications at its absolute discretion.

The Directors reserve the right to reject any application for Shortfall Shares or to allot a lesser number of Shortfall shares than applied for. Application Monies received but not applied towards subscriptions for Shortfall Shares will be refunded as soon as practicable.

No interest will be paid on Application Monies held and returned. Furthermore, the Company will not issue Shortfall shares where to do so would result in a breach of the Corporations Act or the Listing Rules.

The Company will ensure that no person, entity or Shareholder will, through the allocation of Shortfall Shares, acquire a holding of, or (in the case of existing Shareholders) increase their holding to, an amount in excess of 19.9% of all the Shares on issue following the completion of the Offer. The Shortfall will not be placed with Foxfire, Directors of the Company, their associates or related parties of the Company.

1.5 Allotment of the New Shares

Allotment of the New Shares and Attaching Options will take place as soon as practicable after the Closing Date. The Company will determine the allottee(s) of the New Shares and Attaching Options and reserves the right to reject any application.

Until allotment and issue of the New Shares and Attaching Options, the Application Moneys will be held in trust in a separate bank account opened and maintained for that purpose only. Any interest earned on the Application Moneys will be for the benefit of the Company and will be retained by it irrespective of whether allotment and issue of the New Shares and Attaching Options takes place.

1.6 ASX Listing

The Company will make application to ASX within 7 days following the date of this Prospectus for official quotation of the Securities, being the New Shares and the Attaching Options, offered pursuant to this Prospectus. If approval is not granted by ASX within 3 months after the date of this Prospectus, the Company will not allot the Securities and will repay all Application Moneys (where applicable) as soon as practicable, without interest.

A decision by ASX to grant official quotation of the Securities is not to be taken in any way as an indication of ASX's view as to the merits of the Company, or the Securities.

1.7 Privacy Act

Shareholders provide personal information to the Company (directly or indirectly to the Company's share registry). The Company collects, holds and will use that information to service your needs as a Shareholder, facilitate distribution payments and corporate communications to you as a Shareholder and carry out administration.

The information may also be used from time to time and disclosed to persons inspecting the register, bidders for your securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, authorised securities brokers, print service providers, mail houses and the Company's share registry.

You can access, correct and update the personal information that we hold about you. Please contact the Company or its share registry if you wish to do so at the relevant contact numbers set out in this Prospectus.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the Privacy Act, the Corporations Act and certain rules such as the ASIC Settlement Rules. You should note that if you do not provide the information required on the application for New Shares, the Company may not be able to accept or process your application.

1.8 Enquiries

Any questions concerning the Offer should be directed to the Company Secretary, Mr Richard Baker on +61 3 9830 7676.

2 Purpose and Effect of the Offer

2.1 Purpose of the Offer

The purpose of the Offer is to help fund the Company's proposed 12 month exploration and drilling program over its Prospecting Licences ("PL") exploration portfolio, and for general working capital purposes.

For these reasons, the Board needs to raise funds to continue to meet any further costs of implementing the Agreement to enable BCL to conduct future exploration and evaluation of the Maibele North - Ni + Cu project and the Airstrip & Dibete – Cu + Ag project within the Retention Licence areas (should the Retention Licences be granted), and to test additional new targets on Prospecting Licences outside of the Retention Licence areas over the next 12 months. Exploration will be undertaken to seek additional targets with the potential for mineralisation within our Botswana portfolio.

2.2 Effect of the Offer on capital structure

The effect of the Offer on the capital structure of the Company (on an undiluted basis) is set out below.

Shares

Shares currently on issue	188,135,318
New Shares offered pursuant to the Offer	75,254,127
Total Shares on issue after the Closing Date	263,389,445

Options

Options currently on issue exercisable at \$0.10 (10 cents) per option at any time up until 5pm AEST on 30 June 2013.	116,275,143
Expiry of options currently on issue exercisable at \$0.10 (10 cents) per option at any time up until 5pm AEST on 30 June 2013.	(116,275,143)
Attaching Options offered pursuant to the Offer exercisable at \$0.03 (3 cents) per option at any time up until 5pm AEST on 30 June 2016.	75,254,127
Total Options on issue after the Closing Date	75,254,127

Note – the Company will apply for the New Shares and Attaching Options issued pursuant to this Rights Issue to be listed on the Australian Securities Exchange ("ASX"). See Section 1.6 for further details.

Assuming no existing Options are exercised prior to the Record Date, the issue of New Shares under this Prospectus will raise approximately \$752,541, before expenses. In addition to the issue of the New Shares, if all new Attaching Options are exercised prior to the Option Expiry Date, the Company will raise approximately \$2.25 million in addition to the amount raised by the issue of New Shares.

The effect of the Offer on the capital structure of the Company (on a fully diluted basis) is set out below.

Shares currently on issue	188,135,318
New Shares offered pursuant to the Offer	75,254,127
Total Shares on issue after the Closing Date	263,389,445
If all 10 cent Options exercised before expiry date (30 June 2013)	116,275,143
Total Shares after issue and exercise of 10 cent options	379,664,588
If all 3 cent Options exercised before expiry date (30 June 2016)	75,254,127
Total Shares after issue and exercise of all options	454,918,715

Note – the above table showing dilution of shares upon the exercise of options assumes no existing options (being the 116,275,143 options already on issue before the Offer) are exercised by the Record Date and that those existing options and the new Attaching Options to be issued pursuant to this Offer are exercised after the Offer ends but before the Expiry Date (30 June 2013).

2.3 Use of Funds

The funds are planned to be used to continue exploration on PLs outside of the Retention Licence areas over the next 12 months, meet any further costs of implementing the Agreement to enable BCL to conduct future exploration and evaluation of the Maibele North-Ni +Cu project and the Airstrip & Dibete -Cu+Ag project within the Retention Licence areas (should the Retention Licences be granted) and for working capital purposes. However the exploration results will determine whether further additional funding will be required within the 12 months budget to further advance the Company's assets.

2.4 Application of Funds

The funds raised under the Offer will be applied towards the following:

- Further exploration including soil sampling programs, trenching programs, IP surveys and drilling programs on areas mapped during December 2012 and March 2013 quarters within PLs 059/2008 Shashe South, 46/2004 Sampowane and 111/2011 Sampa Central. Mapping on PL059/2008 Shashe South shows that the Maibele North East Extension has the potential of Ni-Cu-PGE's mineralisation due to the presence of ultramafics (serpentinites) that are a host for Ni-Cu-PGE mineralisation in the Magogaphate area. The mapping program conducted on PL46/2004 Sampowane and PL111/2011 Central Sampa concludes that several targets are recommended for further exploration based on their lithology and tectonic structure. The area mapped has been divided into seven separate targets for future soil sampling and trenching programs to test mineralisation presence and tenor of numerous gossans, EM conductors, fold closures and inferred faults.
- Costs to implement the Farm-in Joint Venture Agreement between BCL Limited ("BCL") and BML. The commencement of the farm-in by BCL is subject to the condition precedent that the Retention Licence applications by BML over areas of PLs 110/94 Magogaphate, 111/94 Mokoswane and 54/98 Takane be approved by the Department of Mines in Botswana. If granted, the Retention Licences will allow BML and BCL to continue exploration and evaluation of the Maibele North- Ni +Cu project and the Airstrip & Dibete -Cu+Ag project within the three year Retention Licence period.
- A general review on the potential of the Company's entire Exploration Portfolio in Botswana.

Assuming the Rights Issue and Shortfall Offer are fully subscribed, the funds raised will be allocated as follows:

Item	
Drilling Programs on abovementioned Prospecting Licences	150,000
IP Surveying	30,000
Assaying	15,000
Geological Consultants and services	30,000
Botswana geologists, field crews and general ground operating costs	20,000
Corporate, licence fees, administration and general working capital	495,039
Costs of this issue	<u>12,502</u>
Total	<u>752,541</u>

Note: the funds have been budgeted for the above purposes but this may vary should exploration success require targeted and accelerated drilling on any of the anomalies. It is possible that additional funds exceeding the funds at hand after the issue may be required to further accelerate exploration. Also refer to Section 3 (Risk Factors) as some or all of these PL's will expire in 2013 and 2014. Whilst the Company will apply for renewals or extensions as the case may be, no guarantee can be made that these will be granted by the Government of Botswana.

3 Risk Factors

3.1 Speculative Nature of Investment

The below list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The below risk factors, and others not specifically referred to below, may in the future materially affect the financial performance of the Company and the value of the Securities.

Therefore the Securities carry no guarantee with respect to the payment of dividends, returns of capital or their market value. An investment in the Company is speculative. Eligible Shareholders and potential investors should consult their professional advisers before deciding whether to invest.

3.2 Key risks

(a) *Title risks and Native Title*

The Company has interests in tenements in Botswana. Interests in tenements in Botswana are governed by legislation and are evidenced by the granting of PLs. Each PL is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance.

The Company may lose title to its interest in tenements if licence conditions are not met or if insufficient funds are available to meet PL expenditure commitments.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate native title rights exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations, may be adversely affected. The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

(b) *Retention Licences approval a Condition Precedent of the Farm-in Joint Venture Agreement with BCL Limited*

Retention Licence applications were lodged for areas included within PL 110/94, PL 111/94 and PI 54/98 in September 2012 as required under the *Mines and Minerals Act (Act no. 17 of 1999) Botswana*. Each of PL 110/94, PL 111/94 and PI 54/98 expired on 31 December 2012. To date the Department of Mines (“DOM”) in Botswana has not confirmed approval of, nor issued, the Retention Licences applied for. Approval of the Retention Licences is a Condition Precedent of BCL Limited continuing with the Farm-in Joint Venture Agreement with the Company and should that Condition Precedent not be fulfilled, the Farm-in Joint Venture Agreement will not proceed.

(c) *Expiry of tenements*

Several of BML’s key PLs will expire within the next 12 months.

The current extension of PL 46/2004 (Sampowane) and PL 47/2004 (Gobe Shear) expires on 30 March 2014 and 31 March 2014 respectively. Depending upon exploration results, application to further extend these PLs (or apply for Retention Licences) may be made in compliance with the *Mines and Minerals Act (Act no. 17 of 1999) Botswana* however the decision to extend the PLs (or grant Retention Licences) is entirely within the discretion of the Department of Geological Survey (“DGS”) for PLs and the DOM for Retention Licences in

Botswana. Should the DGS not grant extensions to the PLs (or the DOM not grant Retention Licences), BML will not be permitted to conduct further exploration on the PLs and exploration expenditure that has been capitalised as an asset in the accounts of BML will have to be written-off thereby negatively impacting the Consolidated Statement of Comprehensive Income and Consolidated Statement of Financial Position of BML. In the event that the DGS does not grant BML's extension to the PLs, BML may apply for the PLs again within 3 months, whereby its application will be assessed along with any other competing applications by other explorers.

Other PLs that expire within the next 12 months are PL 059/2008 and PL 070/2008, in north-eastern Botswana, both of which expire on 30 September 2013. The risks and consequences of PL 059/2008 and PL 070/2008 not being renewed are similar to those outlined above.

PL 360/2008 and PL 158/2009 expired on 30 September 2011 and renewal applications were lodged by the Company within the required timeframe. However, as at the date of this Prospectus, the DGS has not confirmed or denied BML's application for renewal to these PLs. Potential investors should be aware that these PLs may not be renewed by the DGS, in which case the consequences are similar to those outlined above.

(d) *Resource and Reserve estimates*

There is a risk that the mineral resources of BML, which are estimated and published on a regular basis by BML in accordance with ASX Listing Rules and the Australasian Code for Reporting of Mineral Resources and Ore Reserves, are incorrect. If those estimates are materially in excess of the recoverable mineral content of the tenements, the production and financial performance of BML would be adversely affected.

(e) *Discovery risk*

Any discovery by the Company may not be commercially viable or recoverable: that is no resources within the meaning of the JORC Code may be able to be established and it may be that consequently no reserves can be established.

(f) *Profitability*

The Company is not presently profitable and may never be so.

(g) *Ability to attract personnel*

BML's success depends, in part, on its ability to identify, attract, motivate and retain suitably qualified management personnel. Competition for qualified staff is strong. The inability to access and retain the services of a sufficient number of qualified staff could be disruptive to BML's development efforts or business development and could materially adversely affect its exploration activity and its operating results.

(h) *Operating risk*

The nature of exploration, mining and mineral processing involves hazards which could result in BML incurring uninsured losses and liabilities to third parties. These could include rock falls, flooding, unfavourable ground conditions or seismic activity, ore grades being lower than expected and the physical or metallurgical characteristics of the ore being less amenable to mining or treatment than expected.

(i) *Insurance risk and hazards*

The Company, as an active participant in exploration programs, may become subject to liability for hazards that cannot be insured against or against which it may elect not to be insured because of high premium costs. The Company may incur a liability to third parties (in excess of its insurance cover) arising from pollution, environmental damage or other damage, injury or death.

(j) *Contract risks*

The Company's subsidiaries operate through a series of contractual relationships with operators and sub-contractors. All contracts carry risks associated with the performance by third parties of their obligations as to time and quality of work performed. Any disruption to services or supply may have an adverse effect on the financial performance of the Company's operations.

(k) *Environmental risks*

The Company's projects are subject to various environmental laws. Many of the activities and operations of the Company cannot be carried out without prior approval from and compliance with all relevant authorities. Resource activities can be environmentally sensitive and give rise to substantial costs for environmental rehabilitation, damage control and losses.

The Company may be:

- (i) subject to potential liability related to the exploration, mining and extraction of metals; or
- (ii) prevented from exploration and mining due to the environmental impact of its activities on an area.

Any such developments might impact adversely on the Company's share price.

It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

(l) *Regulatory risk*

Operations by the Company may require approvals from regulatory authorities which may not be forthcoming or which may not be able to be obtained on terms acceptable to the Company. While the Company has no reason to believe that all requisite approvals will not be forthcoming and whilst the Company's obligations for expenditure will be predicated on any requisite approvals being obtained, Eligible Shareholders should be aware that the Company cannot guarantee that any requisite approvals will be obtained. A failure to obtain any approvals would mean that the ability of the Company to develop or operate any project, or possibly acquire any project, may be limited or restricted either in part or absolutely.

The regulatory environment for BML's operations could change in ways that could substantially increase BML's liabilities, tax liability or costs of compliance. This could materially and adversely affect BML's financial position.

(m) *Equipment risk*

The exploration operations of BML could be adversely affected if essential equipment failed, which if uninsured could result in BML incurring additional expenses and delays in exploration programs with consequences for tenure.

(n) *Sovereign risk*

The Company's exploration activities are carried out in Botswana. As a result, the Company will be subject to political, social, economic and other uncertainties

including, but not limited to, changes in policies or the personnel administering them, foreign exchange restrictions, changes of law affecting foreign ownership, currency fluctuations, royalties and tax increases in that country. Other potential issues contributing to uncertainty such as repatriation of income, exploration licensing, environmental protection and government control over mineral properties should also be considered.

Potential risk to the Company's activities may occur if there are changes to the political, legal and fiscal systems which might affect the ownership and operation of the Company's interests in Botswana. This may also include changes in exchange control systems, expropriation of mining rights, changes in government and in legislative and regulatory regimes.

3.3 Other risks

(a) *Joint Ventures*

The Company may wish to develop its projects or its future projects through joint venture arrangements. Any joint ventures entered into by, or interests in joint ventures assigned to, the Company could be affected by the failure or default of any of the joint venture participants.

Should the Company achieve less than the full subscription under the offer it may have to obtain joint venture partners to meet expenditure commitments specified by the Botswana regulatory authorities when the tenements were granted. There is a risk that the Company may not readily be able to obtain such joint venture partners prior to the expiry date of the tenements. Should an expenditure commitment not be met for a tenement the Botswana regulatory authorities have the discretion to cancel that tenement.

(b) *Climatic risk*

Adverse weather conditions may affect production and exploration.

(c) *War and terrorist attacks*

War or terrorist attacks anywhere in the world could result in a decline in economic conditions worldwide or in a particular region. There could also be a resultant material adverse effect on the business, financial condition and financial performance of BML.

(d) *Commodity price risk*

As the Company's potential earnings from any future operations would be largely derived from the sale of commodities in US dollars, the Company's earnings would be subject to fluctuations in the price of commodities and the Company's earnings and costs would be subject to movements in currency exchange rates (particularly the Australian dollar against the US dollar).

Commodity prices fluctuate and are affected by factors including the relationship between global supply and demand for minerals, forward selling by producers, the cost of production and general global economic conditions.

Commodity prices are also affected by the outlook for inflation, interest rates, currency exchange rates, and supply and demand issues. These factors may have an adverse effect on the Company's exploration and any subsequent development and production activities, as well as its ability to fund its future activities.

(e) *Foreign exchange risk*

Revenue and expenditure in overseas jurisdictions are subject to the risk of fluctuations of international currency exchange markets. Foreign taxes, limitation

on repatriation of earnings, compliance with foreign accounting and business laws, and cultural differences, carry a certain amount of risk. Fluctuations in exchange rates may adversely affect the Company and its share price. The Company does not at present have any currency hedging in place. *Economic risk and external market factors*

Factors, such as, but not limited to, political movements, stock market trends, changing customer preferences, interest rates, inflation levels, commodity prices, exchange rates, industrial disruption, environmental impacts, international competition, taxation changes and legislative or regulatory changes, may all have an adverse impact on BML's operating costs, profit margins and share price. These factors are beyond the control of BML and BML cannot, to any degree of certainty, predict how they will impact on BML.

3.4 Risks associated with the Securities

(a) *Attaching Options may be “out of the money”*

The Attaching Options are currently “out of the money” and may remain so until the Option Expiry Date.

(b) *Dilution*

The interests of Eligible Shareholders who do not participate in the Rights Issue in full and Ineligible Shareholders will be diluted as a result of the Company undertaking the Rights Issue.

(c) *On-going capital requirements for BML*

If BML requires access to further funding at any stage in the future, BML may be adversely affected in a material way if, for any reason, access to that capital is not available. There can be no assurance that additional funds will be available. If additional funds should be raised by issuing equity securities, this might result in dilution to the interests of then existing Shareholders.

(d) *Securities Investment*

Eligible Shareholders and potential investors should be aware that there are risks associated with investment in shares of companies listed on a stock exchange. The value of shares can be expected to fluctuate depending on various factors including general worldwide economic conditions, changes in government policies, investor perceptions, movements in interest rates and stock markets, variations in the operating costs and costs of capital replacement which BML may in the future require. Accordingly, assuming that the Securities are granted official quotation by ASX, they may trade on ASX at higher or lower prices than the issue price.

Each Eligible Shareholder and potential investor should consider whether Securities are a suitable investment for them before deciding to invest in the Securities. Any Eligible Shareholder or potential investor in doubt about investing in shares should consult their stockbroker, accountant, lawyer or other professional adviser immediately.

three-quarters of the Shares on issue, within two months of that general meeting.

6 Continuous Disclosure Obligations

6.1 Nature of this Prospectus

This Prospectus is issued under the special prospectus content rules for continuously quoted securities in section 713 of the Corporations Act. This enables listed disclosing entities to issue a prospectus with less rigorous disclosure requirements if:

- (a) the securities offered by the prospectus are in a class of securities that have been quoted securities at all times in the 3 months before the date of the prospectus; and
- (b) the Company is not subject to certain exemptions or declarations prescribed by the Corporations Act.

Securities are quoted securities if:

- (a) the Company is included in the official list of ASX; and
- (b) the ASX Listing Rules apply to those securities.

The information in this Prospectus principally concerns the terms and conditions of the Offer and the information necessary to make an informed assessment of:

- (a) the effect of the Offer on BML; and
- (b) the rights and liabilities attaching to the New Shares offered by this Prospectus.

As BML has been listed on ASX since 18 January 2008, a substantial amount of information concerning BML has previously been notified to ASX and is therefore publicly available.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to BML which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Eligible Shareholders should therefore also have regard to the other publicly available information in relation to BML before making a decision whether or not to invest in the New Shares. Information can be accessed from ASX or via BML's website at www.botswanametals.com.au.

6.2 Regular reporting and disclosure obligations

BML is a disclosing entity under the Corporations Act. As a disclosing entity it is subject to regular reporting and disclosure obligations under the Corporations Act and the ASX Listing Rules.

These obligations require BML to notify ASX of information about specified events and matters as they arise for the purposes of ASX making that information available to the stock market conducted by ASX.
